

Texas Health Dallas Parking Construction

The replacement of Garage 1 is expected to last through early winter of 2024. During construction, please use temporary vehicle flows and unaffected parking lots and garages.

Vehicle Flow

Due to construction, Garage 1, which primarily services the Margo Perot Center, is closed. Traffic flow will be one-way in this area.

What you need to know:

- The east/west road between the circular (roundabout/button hook entrance and the Glen Lakes entrance will have one lane closed.
- There is a temporary road available to exit the campus north from Perot Lane (indicated in yellow on the map). The road will turn left, travel under the DART rail, and turn north on the service road.
- All vehicles will exit onto Walnut Hill (right turn only).

Signs will be posted to help direct drivers. Please drive carefully and be courteous to others. Talk to team members if you have questions about getting around. We appreciate your patience and flexibility as we make these necessary improvements to our parking offerings.
